Introducing Jireh SGO

Purposeful scholarship administration.
Clear decisions. Accountable stewardship.

A standalone scholarship-administration platform designed to bring greater clarity to applications, household financial assessment, grantor decisions, school coordination, and scholarship accountability.

SEEKING DESIGN PARTNERS AND PILOT ORGANIZATIONS

Jireh SGO is in development. Arete is inviting experienced scholarship-granting organizations to help shape operational requirements and pilot priorities.

LESS ADMINISTRATIVE WORK

Reduce repeated manual exchange among families, scholarship teams, and schools.

INFORMED DECISIONS

Separate eligibility, financial need, human review, and final award authority.

CLEAR ACCOUNTABILITY

Track commitments, required evidence, participating schools, and future settlement records.

THE PRODUCT VISION

Application and renewal workflows. A family-facing process with program-specific questions, document intake, status updates, and annual renewal support.

Configurable financial analysis. SGO-approved need methodologies that distinguish household capacity from legal eligibility and allow documented hardship decisions.

Grantor-governed awards. Role-based reviews, policy versions, human authorization, award commitments, and an auditable record of decisions.

Participating-school connections. Enrollment and eligible-charge verification, award notices, and planned secure data exchange with CROWN and other school systems.

Financial controls and reporting. Distinguish award commitments, verified funds, tuition allocations, reversals, and SGO reporting obligations.

ONE INTENDED WORKFLOW

01	02	03	04	05
APPLY	VERIFY	REVIEW	COMMIT	RECONCILE

Designed for scholarship-granting organizations and independent K-12 scholarship funds.

One connected workflow.

Distinct responsibilities at every step.

Jireh SGO is being built to support authorized coordination. The SGO and participating schools retain their own legal, financial, and operational responsibilities.

THE SGO	THE SCHOOL	JIREH SGO
Sets program policy, verifies eligibility, approves awards, controls scholarship funds, and owns its regulatory filings.	Confirms enrollment and eligible charges, receives authorized funds, and maintains accurate family accounts.	Is designed to coordinate secure application data, reviews, evidence references, award commitments, and financial records.

PLANNED ADMINISTRATIVE LIFECYCLE

01 Apply. A family submits the program-specific application and authorized financial information.

02 Verify. The SGO obtains acceptable evidence and determines which verification rules apply.

03 Decide. Authorized grantor reviewers assess eligibility, need, priorities, and the proposed award.

04 Coordinate. Participating schools confirm enrollment, tuition, and eligible educational charges.

05 Fund. The SGO authorizes and remits payments through its approved financial provider.

06 Reconcile. Grantor and school compare cleared payments, eligible allocations, exceptions, and reports.

PILOT SCOPE AND OPERATIONAL ACCEPTANCE

Pilot planning covers organization records, roles, program definitions, applications, reviewer attestations, award commitments, and audit events. Production use requires separate verification of the standalone portal, financial assessments, integrations, fund administration, disbursement, reconciliation, reporting, and operational security.

PROGRAM-SPECIFIC REQUIREMENTS

The grantor must confirm applicable eligibility, qualification, participation, and operating requirements with its qualified advisers. Jireh SGO does not confer grantor status or federal or state compliance certification.

BECOME A DESIGN OR PILOT PARTNER

Share your application volumes, assessment methods, renewal needs, donor stewardship, audit demands, school interfaces, and greatest administrative bottlenecks.
